

SPEEDCAM

WEINBERGER

LENSES

Wide Angle 18mm

Super Wide Angle 8mm

Perfect Onboard Solution

Weinberger's newest innovations, the wide angle lenses, an ideal match for high speed cameras in Hi-G testing applications. These small and light weight lenses comes in the well known C-mount format and amazingly, the lenses covers a very large image circle of 20 mm. The large image circle coverage means not only the full resolution (1536 x 1024) of the SpeedCam Visario is fully covered, but many other high resolution sensors are covered too! In addition, the lenses are Hi-G ready which makes them well suited for onboard testing where weight and size are critical factors. Weinberger Lenses are available as a wide angle 18 mm and as a super wide angle 8 mm lens.

Technical Description

Weinberger Wide Angle 18mm Lens

Focal Length	• 18 mm
F-Stop	• F/1,8
Camera Mount	• C-Mount
Mechanical Stability	• 100 G in all 3 axes
